

//

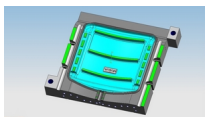

With the latest CAD CAM software the design office of EKOPLAST is capable of carrying out even the most complex projects of injection moulds.

Our team of experienced engineers with many years of experience in designing modern tools for processing plastics makes visions of our customers come true.

EKOPLAST uses CAD CAM software - DELCAM Version 9.0 and NX UNIGRAPHICS 8.0. We accept the following formats of designs from our customers:

COMMUNICATION: CADL, DXF, IGES, STL, VDA, SAT, DWG, CATIA, DGK, IDEAS, PARASOLID, PART, PRO/ENGINEER, SOLIDEDGE, SOLIDWORKS, STEP, UNIGRAPHIC

More information on this software may be found at the developer's site <http://www.delcam.com>
/

More information on NX Unigraphics you will find at the developer's site.
