EKOPLAST is a team of people with many years of experience specialising in:

→ Production of tools for processing plastics and rubber;

→ Production of pressure tools for aluminium alloy casting;

→ Production of plastic products.

We make injection moulds weighing up to 10 tons, and with maximum overall dimensions of 1400x1000mm.

We are specialised in production and assembly of products made of the following plastics: PP, PE, ABS, SAN, PA, PC, PBT, TPE, PCV.

If you would like to receive an offer for an injection mould, please feel free to contact our commercial department.
